PROFESSIONAL SUMMARY

QA Automation Engineer with nearly 6 years of manual and automated testing of web, mobile (Android & iOS) and API products across HRMS, fintech, healthcare, EdTech, e-commerce, logistics and transport systems, including 110+ third-party app reviews for the Mailchimp Partner Program. Built a UI automation framework from scratch and runs web, mobile and API suites with Selenium, Playwright, Appium, Java and Python in Jenkins, GitHub Actions and Docker. Applies structured test design (boundary value, equivalence partitioning, decision tables, state transition), load testing with k6 and JMeter, and hands-on security testing of SQL injection, XSS, IDOR / broken access control and JWT / session flaws with Burp Suite, OWASP ZAP, Nmap and Kali Linux. Uses Claude Code to speed up test design and automation.

CORE SKILLS

Test Design & Manual Testing: Boundary value analysis, equivalence partitioning, decision tables, state transition, exploratory testing, test plans & strategy documents, defect life cycle & severity/priority triage, test metrics & QA reporting (pass rate, defect density), accessibility testing (WCAG 2.1, axe), localization / multi-language testing

Test Automation: Selenium WebDriver, Selenium Grid, Playwright, Playwright CLI, Cypress, Appium (real & cloud devices), Katalon Studio, TestNG, JUnit, Pytest, Robot Framework, Cucumber (BDD), Page Object Model, parallel & cross-browser runs (BrowserStack), visual testing

API & Performance: Postman, Newman, Rest Assured, Karate DSL, contract testing (Pact), load & stress testing with k6, JMeter and Gatling, Grafana & InfluxDB dashboards

Security Testing: Burp Suite (request interception & tampering), OWASP ZAP, Nmap, Kali Linux, OWASP Top 10, OWASP API Security Top 10, SQL injection, XSS, IDOR & broken access control, JWT, session & authentication testing, VAPT, bug bounty reporting

AI-Assisted Testing: Claude Code, Command Code, Playwright MCP (AI-driven browser automation), Google ARTEMIS (AI-driven Android test automation via MCP with Logcat and screenshot capture), AI-assisted test design, prompt engineering, Hermes Agent (Nous Research), Telegram bot

Linux & Scripting: Linux (Ubuntu, Kali) command line, Python, Java, JavaScript, SQL (MySQL) for database testing & data validation

CI/CD & DevOps: Jenkins, GitHub Actions, Docker (containerised test runs), Git/GitHub, Maven, Gradle

QA Process: Test planning & strategy, requirement analysis, RTM, test case design, functional, regression, smoke, sanity, integration, system, UAT, cross-browser and mobile testing, Agile/Scrum

Tools: Jira, ClickUp, Bugzilla, Trello, Figma (UI validation)

DOMAIN KNOWLEDGE

HRMS & Payroll · Fintech · Healthcare · EdTech · Transport Systems · Warehouse (WHMS) & Procurement · Logistics & Parcel Delivery · E-commerce & Payment Gateways · Supply Chain & Bill of Materials · Email Marketing SaaS · Digital Advertising · Mobile Apps (Android & iOS)

PROFESSIONAL EXPERIENCE

Software Quality Assurance Engineer (Automation)

Jan 2023 – Present

BYSL Global Technology Group

- Established the QA process from the ground up: test strategy, test case standards, requirement breakdowns, RTMs and bug triage in ClickUp and Jira.
- Designed and built a UI automation framework from scratch with Selenium WebDriver, Java, TestNG, and the Page Object Model, running regression suites in Jenkins CI.
- Automated API regression with Postman/Newman and Rest Assured, integrated into Jenkins for automated runs and reporting.
- Led QA for the enterprise HRMS suite (Employee, Payroll, Leave, Attendance, WHMS and Procurement) on web and Android, including Appium (Java + TestNG) automation for the mobile app.

- Validated e-commerce cart, checkout, payment gateway and customer account flows, plus logistics and BOM products, across web, iPad, iPhone and Android; verified UI/UX against Figma prototypes.
- Used Claude Code to generate test cases from requirements, scaffold automation scripts and draft clear bug reports, speeding up test design and script writing.

SQA & Test Automation Engineer

Apr 2022 – Dec 2022

Quality Up Services

- Reviewed 110+ third-party apps submitted to the Mailchimp Partner Program against requirements, specifications and technical design documents.
- Wrote and executed end-to-end test cases for the Mailchimp mobile web and native apps on iOS and Android.
- Built web and mobile test automation with Python, Selenium, Pytest and JUnit using BDD/TDD, with HTML and Allure reports.
- Automated API tests with Postman, Rest Assured and Karate DSL (Cucumber, Maven, Gradle).
- Ran load and performance tests with JMeter and Gatling (Scala) and reported response-time and throughput results.

SQA Engineer

Jan 2021 – Mar 2022

SEBPO

- Tested digital ad creatives (banners), web-based creative tools and e-commerce sites across browsers and iPad, iPhone, Android and Windows devices, working with offshore development and QA teams on every new build.
- Wrote and executed end-to-end test cases, scenarios and reports from SRS, wireframes and acceptance criteria.
- Covered functional, GUI, regression, integration, smoke, sanity, usability, ad-hoc, cross-browser and analytics testing.
- Automated repetitive regression checks with Selenium WebDriver and Katalon Studio; tracked work in Jira and Trello.
- Ran JMeter performance tests and delivered analysis reports to the development team.

PROJECTS

AI Assistant Bot on Telegram | *Hermes Agent (Nous Research), Nous Portal cloud, Telegram*

- Deployed a Hermes Agent-based AI assistant on Nous Portal cloud and connected it to Telegram, with persistent memory and scheduled tasks.
- Configured it as a QA helper (test cases, bug reports, test data), a personal assistant and a security-learning companion for recon research and notes.

Portfolio Website with CI Quality Gates | *HTML, CSS, JavaScript, Playwright, axe-core, Lighthouse CI, GitHub Actions, Cloudflare Pages*

- Portfolio at moinulislam.pages.dev (Cloudflare Pages, mirrored on GitHub Pages) protected by Playwright smoke tests, axe-core accessibility checks and Lighthouse CI; GitHub Actions deploys to both only when every check passes.

TRAINING & CERTIFICATIONS

- **Arena Web Security - The Hacker's Arena**
- **Currently learning:** ISTQB Foundation Level (CTFL); hands-on labs on TryHackMe, HackTheBox and PortSwigger Web Security Academy
- Certification Courses: BITM (BASIS Institute of Technology & Management) and People N Tech

EDUCATION

BSc in Computer Science and Engineering

2020

Bangladesh University of Business and Technology (BUBT)
